

AUTOMOTIVE TECHNOLOGY Advisory Board Meeting Agenda

Wednesday, January 28th, from 4:00 to 5:00 pm in room 306 at the WRCC

Trade and Industrial Center, 45 Career Circle, Brattleboro, VT 05301

- Tour the auto shop, show new lifts
- Show the new Autel scan tool with battery tester attachment and TPMS tool
- Talk about EV training car and future technology
- Talk about what current industry skills students should be learning
- What emerging trends should we prepare students for in the next 3-5 years?
- What topics or skills need more emphasis in the curriculum?
- What additional learning activities or modules would benefit students most?
- What barriers prevent students from transitioning into the workforce?

Purpose:

The Advisory Board aims to strengthen CTE programs by providing input for curriculum and related district program activities. It also helps increase community awareness and participation in CTE programs. The Advisory Board makes recommendations but is not responsible for funding, program implementation, or supervision.

OBJECTIVES

The objectives of the Advisory Board are to partner with the CTE department to:

- ensure a smooth transition for students from school to college and careers
- Identify critical workforce competencies and industry trends for incorporation into CTE programs and activities
- Increase the number of youths preparing to enter college or skilled occupations
- improve employers' access to qualified young people
- Increase the number of work-based learning opportunities for students
- Support the increase in externship opportunities for teachers
- Increase the number of CTE programs that are industry-certified
